# Minder Database Monitoring Platform

Take deep dive and take control of your database

Every usual day for a database administrator is no less than hectic day for others. If you are one of those handling huge databases, juggling to get your database performance optimized and still filled with a need to do to more, it's me to take a look around. Dig deeper into behaviour of your databases with MindArray Minder Database monitoring platform.

MindArray Minder Database monitoring enables you to monitor your databases upto 3rd level with detailed insight, ease of use and much more efficient error resolution making applications much more smart and quick to roll out.

Key Benefits to Business

- Monitor key performance metrics like slow queries, top users, programs, SQL and more.

- Single platform for all database environments monitoring needs.

- Identify issues one-touch RCA, along with correlation to know affected areas and reduce resolution time.

- Schedule mundane tasks to auto run SQL jobs and reporting, save time and focus on improvements.

- Insights on granular data trends, never miss informa on due to aggrega on.

- Easy to deploy and monitor with 500+ prebuilt & custom data widgets.

Key Features

All in one solution to monitor multiple database environment enabling monitoring of heterogeneous database environments with single platform. Equipped to monitor Oracle, PostgreSQL, SQL Server, MySQL & IBM DB2 databases with agent-less architecture.
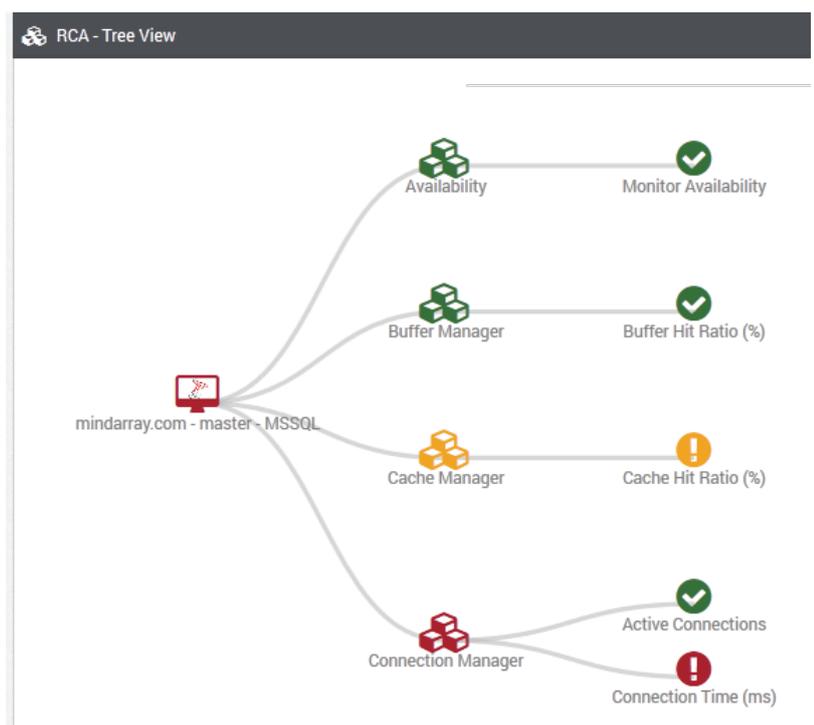

Single dashboard to display performance and availability of multiple databases, database snapshot and top/least N level analytics.

Monitor till third level of databases by monitoring tables, sessions and query level to monitor important attributes like, index size, row size, session memory & CPU utilization, memory utilization by each query and much more; at each respective layer.

Fully customizable 500+ data widgets to monitor multiple database instances and visualize them into personal dashboard of DBA or even application support team using widgets. Widgets are highly customizable w.r.t. type of graph, time span, granularity and much more. With 500+ widgets such as top slow queries, locked tables, and buffer hit ratio are built-in and instantly available. Minder offers support for all major open source and commercial databases on various platforms. Users can design and customize their monitoring according to their preferences.

Correlation & One-touch RCA to identify the attributes which are actually hindering performance of database and nail down the ones violating thresholds. Identify issues & take proactive measures with one touch RCA, increase productivity & efficiency of your databases and software applications.

Monitors Cluster of Database Instances with 24/7 Monitoring enables collection & data aggregation from multiple database instances – to provide at glance database performance view of whole cluster. Administrator will be able to get comprehensive report for number of user sessions and also be alerted about user and session draining database resources.

System Requirements

Mindarray's Minder is very low foot print product, which in turn helps you with much lower TCO (Total Cost of Ownership) for the product.

Hardware	Minimum Requirements
CPU	Dual Core Processor, 2GHz+
RAM	4GB
HDD	30GB free disk recommended
Software	Minimum Requirements
OS	Any Windows Server, 64-bit
Browser	IE 11+, Firefox 30+, Chrome 30+
Database	In-built PostgreSQL database, no external database deployment

NOTE: The minimum server requirements listed above are based on default configurations only. The requirement may change depending upon load on system.

About Mindarray Systems

MindArray is an IT performance management suite for businesses and organizations to monitor and analyze performance across multiple applications and network resources. MindArray helps you take control of your dynamic IT infrastructure by cross-domain monitoring, multiple product support, SLAs, forecast analytics and other impressive features. Driven by innovation, MindArray is built from the ground up to provide next generation IT management. MindArray's cost effective management solutions can be deployed in less than hour and are designed to avoid dependence on any server host.
